

Labtopia Training offers our clients fully customizable technical and soft skills curricula proven to both improve and empower staff. Our multifaceted approach to continuing education helps your staff gain unique skills and consistent performance. Our trainers have technical and scientific backgrounds and understand the issues and challenges faced in your unique environment.

We help you continuously improve your staff with a number of strengths of our own:

Strong Training Background

Our team of trainers has over 25 years of experience in industry. We are comprised of former technical staff who have trained both technical and non-technical personnel on a wide array of topics and can relate to your entire employee spectrum.

Employee Development

A properly planned employee training program has been proven to both increase employee morale as well as immediately increase value-added skills into the workplace. As previous managers, we understand the importance of providing employees with all the tools available to ensure their success, and ultimately the company's.

Value for All

Our experts have worked with small, local companies to multi-national and global companies across varied industries. We understand that an effective training program is not found in a box. We can customize training solutions to meet the current and future needs of your unique situation, and help keep your employees engaged and productive.

Track Record of Satisfied Students

Our numbers speak for themselves:

- 100% of students found training sessions very useful to their job.
- 100% were likely to recommend to a colleague or friend.
- >80% saw a significant improvement in their skill set as a result of attending one of our training sessions.

We Have The Tools To Properly Equip Your Team

- **Quality**
- **Instrumentation**
- **Regulatory**
- **Safety**
- **Team Building**
